

Check Follow Status

Endpoint

URL: `/:projectId/users/:userId/follow`

Method: `GET`

Authentication Required: Yes

Description

Check whether the authenticated user is following a specific user.

Request

Path Parameters

Parameter	Type	Required	Description
<code>userId</code>	<code>string</code>	Yes	ID of the user to check against.

Headers

Header	Type	Required	Description
<code>Authorization</code>	<code>string</code>	Yes	Bearer token for authentication.

Body Parameters

None

Example Request

```
GET /proj1234/users/abcd123/follow
Authorization: Bearer <ACCESS_TOKEN>
```

Response

Success Response (200 OK)

```
{
  "isFollowing": true
}
```

or

```
{
  "isFollowing": false
}
```

Error Responses

Server Error (500 Internal Server Error)

```
{
  "error": "Internal server error.",
  "code": "follow/server-error",
  "details": "<Error message>"
}
```

Notes

- This endpoint checks if a follow relationship exists between the authenticated user and the target user.
- Always returns a 200 response with a boolean flag `isFollowing`.
