

Get Comments

Endpoint

URL: `/:projectId/comments`

Method: `GET`

Authentication Required: No

Description

Fetches a paginated list of comments filtered by entity ID, user ID, or parent comment ID.

Supports optional sorting by newest, oldest, top (most upvoted), or most controversial. Replies, direct comments, and user-authored comments can all be queried. Optionally includes associated entity data.

Request

Query Parameters

Parameter	Type	Required	Description
<code>entityId</code>	<code>string</code>	No*	ID of the entity to fetch comments for.
<code>userId</code>	<code>string</code>	No*	ID of the user to fetch their comments.
<code>parentId</code>	<code>string</code>	No*	ID of the parent comment to fetch its replies.
<code>sortBy</code>	<code>string</code>	No	Sorting method: <code>new</code> (default), <code>old</code> , <code>top</code> , <code>controversial</code> .

Parameter	Type	Required	Description
page	number	No	Page number for pagination. Defaults to 1.
limit	number	No	Number of results per page (max: 100). Defaults to 10.
includeEntity	string	No	If true, includes related entity data in each comment.

Note: At least one of `entityId`, `userId`, or `parentId` must be provided.

Response

Success Response (200 OK)

Returns an array of comments matching the filters:

```
[
  {
    "id": "comment-001",
    "entityId": "entity-123",
    "userId": "user-456",
    "content": "This is a comment.",
    "mentions": [],
    "upvotes": ["user-789"],
    "downvotes": [],
    "attachments": [],
    "metadata": {},
    "createdAt": "2025-05-11T10:00:00.000Z",
    "updatedAt": "2025-05-11T10:00:00.000Z"
  }
]
```

Error Responses

Invalid Query (400 Bad Request)

```
{
```

```
"error": "Invalid request data",  
"code": "comment/invalid-request"  
}
```

Invalid Limit (400 Bad Request)

```
{  
  "error": "Invalid request: limit must be a positive number.",  
  "code": "comment/invalid-limit"  
}
```

Invalid Page (400 Bad Request)

```
{  
  "error": "Invalid request: page must be a whole number greater than 0.",  
  "code": "comment/invalid-page"  
}
```

Server Error (500 Internal Server Error)

```
{  
  "error": "Internal server error.",  
  "code": "comment/server-error",  
  "details": "[error message]"  
}
```

Notes

- One of `entityId`, `userId`, or `parentId` must be specified.
- Sorting modes:
 - `new`: Most recent comments first (default).
 - `old`: Oldest comments first.
 - `top`: Highest upvote-to-downvote ratio.
 - `controversial`: High activity with mixed votes.
- Results are paginated. Maximum of 100 per page.

- If `includeEntity=true` , each comment includes basic data about its entity.
- Votes are returned as arrays of user IDs.
- Querying does not require authentication.
