Here's the full API documentation for the `DELETE /entities/:entityId` endpoint:

Delete Entity

Endpoint

URL: `/entities/:entityId` **Method:** `DELETE` **Authentication Required:** Yes

Description

Deletes an existing entity within the project. Only the entity author or a master user can perform this operation. Deletion also deducts reputation from the original author.

Request

Path Parameters

Parameter	Type	Required	Description
`entityId`	`string`	Yes	The ID of the entity to delete.

Headers

Header	Type	Required	Description
`Authorization`	`string`	Yes	Bearer token for authenticated users.

Response

Success Response (`204 No Content`)

Entity was successfully deleted. No response body is returned.

Error Responses

Invalid ID (`400 Bad Request`)

```
{
    "error": "Invalid entityId.",
    "code": "entity/invalid-id"
}
```

Not Found (`404 Not Found`)

```
{
    "error": "Entity not found.",
    "code": "entity/not-found"
}
```

Unauthorized (`403 Forbidden`)

```
{
    "error": "Not authorized to delete this entity.",
    "code": "entity/not-authorized"
}
```

Delete Failed (`404 Not Found`)

```
{
    "error": "Entity not found or already deleted.",
    "code": "entity/delete-failed"
}
```

Server Error (`500 Internal Server Error` **)**

```
{
  "error": "Failed to delete the entity.",
  "code": "entity/server-error",
  "details": "[error message]"
}
```

Notes

- Only the original author or a master user can delete an entity.

- Deleting an entity deducts reputation points from the author if applicable.

- If the entity does not exist or was already deleted, the operation is a no-op. Here's the full API documentation for the `DELETE /entities/:entityId` endpoint:

Delete Entity

Endpoint

URL: `/entities/:entityId` **Method:** `DELETE` **Authentication Required:** Yes

Description

Deletes an existing entity within the project. Only the entity author or a master user can perform this operation. Deletion also deducts reputation from the original author.

Request

Path Parameters
