Remove Upvote from Comment

Endpoint

URL: `/:projectId/comments/:commentId/remove-upvote`

Method: `PATCH`

Authentication Required: Yes

Description

Removes a previously added upvote from a comment by the authenticated user.

- Subtracts the user's ID from the `upvotes` array.
- Decreases the reputation of the comment's author.

Request

Path Parameters

Parameter	Type	Required	Description
`commentId`	`string`	Yes	The ID of the comment to un-upvote.

Headers

Header	Type	Required	Description
`Authorization`	`string`	Yes	Bearer token for authenticated users.

Response

Success Response (`200 OK`)

Returns the updated comment:

```json
{
  "id": "comment-123",
  "entityId": "entity-456",
  "upvotes": [],
  "downvotes": [],
  "content": "Insightful post!",
  ...
}
```

Error Responses

Missing Comment ID (`400 Bad Request`)

```json
{
  "error": "Missing required data",
  "code": "comment/missing-data"
}
```

Not Found (`404 Not Found`)

```json
{
  "error": "Comment not found",
  "code": "comment/not-found"
}
```

Not Upvoted (`409 Conflict`)

```json
{
  "error": "User hasn't upvoted this comment",
  "code": "comment/not-upvoted"
}
```

Server Error (`500 Internal Server Error`)

```
{
  "error": "Internal server error.",
  "code": "comment/server-error",
  "details": "[error message]"
}
```

Notes

- The authenticated user must have already upvoted the comment.

- Removes the user's ID from `upvotes`.

- Deducts reputation from the comment's author.

- A `409 Conflict` is returned if the user hasn't upvoted the comment.
