Add Entity to List

Endpoint

URL: `/:projectId/lists/:listId/add-entity`

Method: `PATCH`

Authentication Required: Yes

Description

Adds an entity to the specified list for the authenticated user. Prevents duplicate additions.

Request

Headers

Header	Type	Required	Description
`Authorization`	`string`	Yes	Bearer token for authentication.

Path Parameters

Parameter	Type	Required	Description
`listId`	`string`	Yes	ID of the target list.

Body Parameters

Field	Type	Required	Description
`entityId`	`string`	Yes	ID of the entity to add to the list.

Example Request

```json
{
    "entityId": "abc123"
}
```

Response

Success Response (200 OK)

```json
{
    "id": "list_abc",
    "projectId": "proj1234",
    "userId": "user_xyz",
    "name": "Favorites",
    "entityIds": ["abc123", "xyz789"],
    "createdAt": "2024-01-01T00:00:00.000Z",
    "updatedAt": "2024-01-01T00:00:00.000Z"
}
```

Error Responses

Missing listId or entityId (400 Bad Request)

```json
{
    "error": "Missing listId",
    "code": "list/missing-data"
}
```

List Not Found (404 Not Found)

```json
{
    "error": "List not found",
```

```
    "code": "list/not-found"
  }
```

Entity Already Exists (409 Conflict)

```
{
  "error": "Entity already exists in the list",
  "code": "list/entity-exists"
}
```

Server Error (500 Internal Server Error)

```
{
  "error": "Internal server error.",
  "code": "list/server-error",
  "details": "<Error message>"
}
```

Notes

- Entity will not be added again if it already exists in the list.

- The response includes the updated and populated list object.
